Bronchoscope System

HugeMed

FDA 510(K) Cleared
P/N: ENG-US-CATA-fBRS-suBR-INTENT-202302V3.0

An optimal Bedside Bronchoscopy Solution

Portable

- Light weight and compact;
- Especially convenient for ICU daily examination.

Cost-effective

- Raises cash flow ratio;
- No maintenance cost;
- No disinfection cost.

No Cross-infection

- Single-use, one scope for one patient, no cross infection trouble.

Always Ready To Go

- No need to wait for reprocessing, always available for your needs.

Single-use Bronchoscope

HugeMed™ BR Series
BR-M58
5.8/3.4mm

HugeMed™ BR Series
BR-M50
5.0/2.8mm

HugeMed™ BR Series
BR-M40
4.0/2.0mm

HugeMed™ BR Series
BR-M32
3.1/1.2mm

HugeMed™ BR Series
BR-M22
2.2/0mm

Chip on tip

Sterilized

Deflection	Working Length	Field of View
210° Up/Down	600mm	120°

More Sizes More Possibilities

HugeMed™ BR series single-use bronchoscope has 5 models that targets different clinical usages. By a feat of an ultra-compact CMOS sensor, the scopes are having slimmer outer sizes but larger working channels, which provides more possibility to finish different therapy operations.

BR-M22 2.2/0mm	BR-M32 3.1/1.2mm	BR-M40 4.0/2.0mm	BR-M50 5.0/2.8mm	BR-M58 5.8/3.4mm
--------------------------	----------------------------	----------------------------	----------------------------	----------------------------

SLIM MODELS

- A petite person intubation or airway examination;
- DL tube position checking;
- Reach to smaller bronchus for lung peripheral checking or therapy.

ROUTINE MODELS

- The size of BR-M40 and BR-M50 can pass most of the adult ET tube, suitable for routine intubation and bedside bronchoscopy therapy. The thickness of their insertion tubes offers more maneuverability when doing the operation.

THERAPY MODELS

- The scopes whose working channels larger than 2.8mm normally are defined as the therapy models. HugeMed™ BR-M58 has a very fine working channel of 3.4mm, which provides 28.5% space more than that of 3.0mm, and 47.4% than that of 2.8mm.

BR-M50
5.0/2.8mm

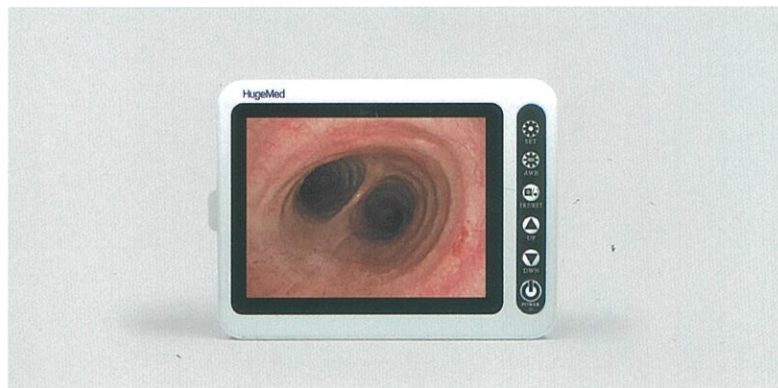

Compare with another flexible bronchoscopes whose outer diameter is nearby 5.0mm but the working channel is less than 2.6mm, the BR-M50 is a versatile bronchoscope with a regular outer diameter but a large channel which brings the advantages of:

- Able to reach smaller bronchus;
- Adapt to more ETT/DLT sizes;
- More power for suction.

Imaging Processor

Image processing, display and recording

All-in-one

Specification	
Model	VLM-03
Size	8 inches
Weight	1.0 Kg
Storage	32 GB
Display resolution	1024*768 pixels
Video output capacity	HDMI, max 1920*1080 pixels
Battery capacity	≥6400 mAh
Battery working time	120-150mins
Function	White balance, freeze
