

Mediplus POPY™ Pessary

A conservative, cost-effective solution for pelvic organ prolapse or procidentia

The Mediplus POPY™ was the world's first silicone shelf pessary. This innovative pessary offers a wide range of benefits including:

Enhanced quality of life – POPY™ mitigates the impact of prolapse on everyday life

Ease of use – high-quality medical grade silicone ensures that the POPY™ is soft and malleable for ease of fitting and removal

Reduced risk – the softness of the POPY™ pessary reduces the risk of erosion

Low-cost and conservative – compared with surgical intervention

Expert design – the POPY™ range is the result of extensive consultation with both clinicians and patients to ensure optimal effectiveness and patient comfort

“POPY™ is a far better choice for the patient as it is not rigid at all but rather flexible, therefore insertion and removal is not painful for my patients”

Claudine Domoney, Lead Urogynaecologist,
Chelsea & Westminster Hospital

Insertion technique

1. Prolapse

2. Initial insertion

3. Pessary inserted further

4. Pessary in situ

Ordering information
